FEATURED BOOKITO

The latest Gallup Poll for 2023 indicated that the happiest nation in the world was FINLAND. However, because of a lack of hope for the future, and a great sense of being alone among those 30 years of age and under, America went down several points, and thus fell out of the top 20 happiest countries of a polled 144 nations. If you happen to be living in America, this is the book for you. Download the book and pass it on to others. America, as well as many other nations of the world, need a heavy dose of happiness. Maybe this book will help.
