NAMIBIA BIBLE PROJECT BEGINS!

There are few news reports that can be greater than the printing of a new edition of a Study Bible for an entire nation. This effort is called the Namibian Bible Project. It developed over a period of about two years. The project was first initiated by Clarice Lawrence—a 40-year retired school teacher of Namibia—who made an offer to churches with her only Bible she had in hand. It was a Bible that we had printed for Namibia over ten years ago. However, Clarice prayed that God would turn her dreams into reality. It was then that Clarice contacted me that she had “sold in promise” over 1,000 Bibles among many churches. We answered, “We have no Bibles.”

Nevertheless, our lack of Bibles for marketing in Namibia sparked us into action. So Martha and I began the long process of formatting a special Study Bible that could be printed in Windhoek, Namibia. Consequently, we produced a newly formatted Study Bible that would be printed by a local printer in Windhoek. That printing is being completed this second week of March, and is being marketed across the country of Namibia. **God does bless our dreams.**

This special Study Bible with the 120-page *Encyclopedic Bible Study Guide* will be marked nationwide in order to encourage a restoration to Bible study. Two brothers from Cape Town will be traveling this year to Namibia in order to initiate **Home Bible Schools** with sincere students throughout Namibia.

HOME BIBLE SCHOOLS

The Namibia Bible Project also includes a request by the **Home Bible School Team** to restore Bible studies in homes across the country of Namibia. The leaders of this team, **Denville Willie** and **Malvin Kivedo**, will be traveling across the country with the new Study Bible in order to encourage Bible-loving people to start a Home Bible School in their homes for their communities. If someone would like to invite this team to come to their community with Study Bibles, then they must WhatsApp the following number:

Denville Willie
